

Eyelid Hygiene

If your eye care professional has recommended the introduction of eyelid hygiene it is important that you include this as part of your daily routine, like showering or brushing your teeth. Daily eyelid care helps prevent the build-up of oils and crusted matter around the eyelid and lash area.

The Blepha Range for eyelid hygiene

The Blepha product range uses a unique formulation that gently lifts debris without the need to rub, scrub, foam or rinse. They are FREE from preservatives and perfumes so they are kind to your skin and eyes and are ideal for people with sensitive skin. They even remove waterproof mascara. The Blepha product range has been specially formulated by Europe's leading independent pharmaceutical company dedicated to ophthalmology for eye lid hygiene and has been fully tested by Dermatologists.

Blephasol

Now available Blephasol Duo

'Duo' for convenience

100ml Blephasol lotion and 100 pads in 1 pack!

- Easy-to-use cleansing solution (100ml bottle)
- Preservative, perfume and detergent free
- Lash area and skin cleansing
- No need to mix or rinse
- Suitable for sensitive skin
- Can be used by all contact lens wearers
- No soap effect or stinging, just gentle cleansing
- Pleasant to use, moisturises and soothes

Ideal for everyday use

Up to 2 months usage per bottle makes Blephasol an economical choice.

Excellent, non-irritant, non-greasy eye-makeup remover.

Blephasol Duo includes 100 specially designed pads.

DIRECTIONS FOR USE

1. Use as directed (usually once or twice a day)
2. Put solution on to pad and gently wipe along the lower inner eyelid, upper eyelid and lash area to remove accumulated oily debris and crusted matter
3. No need to rinse afterwards
4. Repeat for the other eye using a new pad
